

What Wood Bay Customers say about dynaBLADE

dynaBLADE offers durability and a cutting edge that regular blades can never match. It helps turf professionals set the stage for great performances. We thought you'd like to know what our customers have said about it:

Eric Buchholz, Waushara Country Club, Wisconsin, "Your dynaBLADE is an unbelievable product. Thank you for your quick service and terrific engineering! I will never buy anything else."

Dave Stowe, Newton Commonwealth Golf Course, Massachusetts, "The dynaBLADES have worked great for me and the other clubs that used them in the early spring."

Morris Brown, Champions Turf Farms, Bay City, Texas, is a dynaBLADE fan and one of our principal distributors. He wonders why turf professionals would use any other blade for verticutting and recommends using nothing else but dynaBLADE. After all Wood Bay's dynaBLADE is designed to fit all high end professional verticutting machines and can be customized to fit most others. Check out our dynaBLADE brochure with comprehensive listings of as many top professional verticutting machines as you can name by clicking on the "**choose your blade**" link on the dynaBLADE product page. If it doesn't list your blade, call us and if at all possible we'll design one to match your machine.
